

Larval

# AP100

Dry Larval Diet

**Larval AP100** is a scientifically designed and nutritionally balanced, water stable diet for shrimp and fish larvae. The ingredients are selected for their high quality, attractability and digestibility, containing HUFA's, Phospholipids and Carotenoid pigments. AP100 provides essential nutrients in compliment to natural food (algae and Artemia) feeding regimes for larval shrimp and fish.

## Features & Benefits

- Utilizes highly attractable and digestible ingredients.
- Nutritionally balanced diet for the culture of larval and post larval shrimp.
- Excellent feed for finfish during larval and fingerling stages.
- Contains **Vpak** (Vitality Pak) to enhance disease resistance.
- Partial replacement for algae and Artemia.
- Nitrogen-preserved to extend shelf-life.
- Reduces exposure to diseases commonly carried by natural foods.

## Product Application & Storage

- This diet is designed to feed larval and post-larval stages of shrimp and fish.
- Frequent feeding and uniform distribution is very important to ensure adequate diet availability.
- Best results occur when kept in suspension.
- Best if used within twenty-four (24) months from date of manufacture.
- Store in a cool (22° C/72° F), dry, well-ventilated area away from sunlight.
- Refrigeration or frozen storage will extend shelf life.
- Opened cans should be tightly sealed and stored at 0°C (32°F) or lower.
- Rotate stock to use oldest product first ("first in, first out" principle).

## Packaging

Nitrogen-flushed cans: 500 gram (1.1 lb) 12 per case

## Guaranteed Analysis

Crude Protein	Minimum	50.0 %
Crude Fat	Minimum	12.0 %
Crude Fiber	Maximum	2.5 %
Moisture	Maximum	10.0 %
Ash	Maximum	15.0 %
Phosphorus	Minimum	1.3 %

## Particle Size

<b>1</b>	<50 microns	Zoea 1 to Zoea 3
<b>2</b>	<100 microns	Zoea 3 to Mysis 3
<b>3</b>	100-150 microns	Mysis 3 to PL 3
<b>4</b>	150-250 microns	PL 3 to PL 6
<b>5</b>	250-450 microns	PL 6 to PL 12

## Ingredients

A nutritionally balanced highly digestible formulation of animal protein products of marine origin, plant protein (including algae), yeast, fish and vegetable oils, vegetable starches, vitamin and mineral premixes, anti-oxidants, pigments, and biodegradable binders.
